Summary

Software Engineering student and Full-Stack Developer focused on building practical, real-world web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL. Built donation and business websites with responsive design, clean architecture, and user-focused experiences. Strong interest in front-end and back-end development, scalable systems, and solving real problems through software.

Projects

Menassat Al-Khair

Full-Stack Developer | Graduation Project

- Built an Arabic-first full-stack donation platform connecting donors, verified charities, and people in need.
- Developed core platform features including item donations, fundraising campaigns, charity verification workflows, and role-based access control.
- Created responsive frontend interfaces with React 19, Vite, and Tailwind CSS.
- Built backend APIs and data models using Node.js, Express.js, MongoDB, and Mongoose.

Skyline Glass

Front-End Developer

- Built a 6-page responsive marketing website for a Durham, NC glass installation company.
- Used HTML, CSS, CSS Grid, custom properties, and Font Awesome to create a clean client-facing site.
- Designed a multi-field quote request flow to support lead generation.
- Highlighted trust signals including 500+ projects and a 4.9★ client rating.
- Repo: github.com/Mohammed55676/Blue-Ray-Glass

Experience

Blue Ray Web Solutions

Front-End Developer Intern

- Completed practical training in front-end web development within a professional agency environment.
- Worked on responsive pages, UI improvements, and clean implementation using HTML, CSS, and JavaScript.
- Collaborated with team members and followed professional development workflows using Git and GitHub.
- Website: bluerayws.com
